

Wake Up Calls.

30 paste-ready Omni prompts — each a life jolt (a scolding, a pressure, a year slipping by) that hard-cuts to your real sudden wake and a one-line resolve. Your new signature, generated.

— How the jolt-wake works

Four things to get right — then rotate these openers across your series.

The structure of every jolt

Two beats in 10 seconds: ACTION 1 is the JOLT (a dream / pressure / scolding), ACTION 2 is the WAKE (you bolt awake, then a one-line resolve). Then in your edit, hard-cut straight from the wake into that day's real footage.

This is your recognition

Open your cornerstone reels (Days 1, 8, 15, 22, 30) with a jolt-wake so people learn the signature. Rotate the TYPE of jolt — never the same one twice in a row — so the opening stays fresh and reach stays high.

Keep the tone a wake-up call

Every jolt resolves on a line of resolve ('not this year,' 'watch me,' 'enough'). It should feel like motivation, never like dread or self-attack. That's what makes people save and tag, not scroll away.

Stay inside the rules

Your own avatar only • voices in dreams are generic/unnamed (no real people) • no real app logos or brand names • no copyrighted music — keep audio to voice + ambient, then add an Instagram in-app track at posting. Every clip is SynthID-watermarked; IG may label it 'Made with AI' (fine for a stylised dream).

Wellbeing note: these are motivational wake-up calls, not fear bait. Keep them landing on resolve, skip anything that feels genuinely distressing, and pair the AI jolt with your real, self-filmed wake-up + day. The story is "tired IT guy decides to change" — hopeful, not heavy.

The 30 jolt-wake prompts

Each: the JOLT (dream beat), the WAKE LINE you say, and the full prompt to paste into Gemini Omni (9:16, 10 sec, your avatar, two actions).
