

DAY 4 • FULL REEL • GEMINI OMNI

POV: the developer who woke up early.

The entire Day-4 reel built from six 10-second Omni clips — each with TWO actions so no second is wasted. Avatar-consistent, copyright-safe, ready to paste.

Built for @mahe_r.eddits • ~55-sec reel • 6 clips

9:16
vertical, 10 sec each

6 clips
1 hook + 4 scenes + 1 CTA

2 actions
per clip = full 10 s

Avatar
same face + look throughout

How to build this reel

Generate clips in order

Use the same avatar and the same 'warm sunrise / quiet morning' look for every clip so they cut together seamlessly. If a clip drifts, add: 'keep the same room, outfit and light direction as the previous clip.'

Each clip = 2 actions = full 10 sec

Every prompt packs two beats so none of the 10 seconds is wasted. If an action feels rushed, refine with 'slow action 1, give action 2 more time' rather than rewriting.

Assemble in CapCut

Drop the 6 clips in order. Trim each to its tightest beat, keep the total ~45–60 sec. Add jump cuts on motion. Captions are already spoken — add matching on-screen text in the safe zone (108px top / 320px bottom).

Audio + posting

Keep Omni's voice + ambient; add ONE Instagram in-app calm lo-fi track quietly underneath at posting time for reach + full copyright safety. Pick a strong cover frame (the balcony or the sunrise stretch). Post from a Creator account.

Heads-up: this reel is all-AI, so it will likely be labelled 'Made with AI' on Instagram (SynthID). That's totally fine for an atmospheric 'morning routine' piece like this — just don't present AI footage as proof of real physical results elsewhere in the series.

The 6 clips — in order

Generate each in Gemini Omni with your avatar, then assemble in order. VOICE = what the avatar says • TEXT = on-screen caption • PROMPT = paste into Omni.

CLIP 0 — HOOK0:00–0:10

Black-screen text → sunrise reveal + alarm

VOICE	(no spoken words — just ambient; text only)
TEXT	POV: you finally stopped hitting snooze.
PROMPT	Vertical 9:16, 10-second clip, native audio. Use my saved avatar; keep face, hair and build identical to my reference. OPEN on a full black screen for ~1.5 seconds with bold centered white text: ‘POV: you finally stopped hitting snooze.’ ACTION 1 (0:00–0:05): hard cut to a dark bedroom – a phone alarm glows on the nightstand; the avatar’s hand reaches over and calmly silences it (no snooze), and he sits up on the edge of the bed. ACTION 2 (0:05–0:10): he stands, walks to the window and pulls the curtain slightly so a sliver of warm sunrise light cuts across the room and his face. Camera: locked-off, then a slow push-in toward the window on action 2. Style: calm, cinematic, realistic. Lighting: very low key then a warm sunrise sliver. On-screen text: keep the opening line, then fade it out. Audio: soft alarm tone, then quiet room tone – no music.

CLIP 10:10–0:20

Curtains open + stretch by the window

VOICE	“Nobody’s awake yet.”
TEXT	Nobody’s awake yet.
PROMPT	Vertical 9:16, 10-second clip, native audio. Use my saved avatar; identity consistent with the previous clip (same room, same outfit, same light direction). ACTION 1 (0:00–0:05): the avatar pulls the curtains fully open and warm golden sunrise light floods the room; he squints slightly and breathes in. ACTION 2 (0:05–0:10): he raises both arms into a slow overhead stretch by the window, then drops them and looks calmly toward the lens, saying softly: ‘Nobody’s awake yet.’ Camera: slow dolly-in from medium to medium-close. Style: warm, serene, realistic. Lighting: strong golden-hour backlight through the window, soft fill on the face. On-screen text bottom third: ‘Nobody’s awake yet.’ Audio: avatar voice + faint morning birds/room tone, no music.

CLIP 20:20–0:30

Coffee brewing + sitting to journal

VOICE	“No Slack pings. No noise.”
TEXT	No Slack pings. No noise.
PROMPT	Vertical 9:16, 10-second clip, native audio. Use my saved avatar; identity consistent. Quiet kitchen/desk corner, same warm morning light. ACTION 1 (0:00–0:05): close on coffee brewing/pouring into a mug (steam rising), the avatar’s hands lifting the mug. ACTION 2 (0:05–0:10): he sits at a tidy desk, sets the mug down, opens a journal and starts writing; he glances up at the lens and says quietly: ‘No Slack pings. No noise.’ Camera: macro on the pour, then cut to a medium of him sitting; gentle push-in. Style: cozy, cinematic, shallow depth of field. Lighting: warm window light, soft shadows. On-screen text: ‘no pings. no noise.’ Audio: avatar voice + coffee/pen ambience, no music.

CLIP 30:30–0:40

Balcony at dawn + a slow sip

VOICE	“This hour is mine...”
TEXT	This hour is mine...
PROMPT	Vertical 9:16, 10-second clip, native audio. Use my saved avatar; identity consistent. A small balcony overlooking a quiet, near-empty street at dawn. ACTION 1 (0:00–0:05): the avatar steps out onto the balcony, mug in hand, and looks out over the calm empty street as soft dawn light hits him. ACTION 2 (0:05–0:10): he leans on the railing, takes a slow sip, exhales, and says reflectively toward the lens: ‘This hour is mine.’ Camera: wide establishing of the quiet street, then cut to a medium-close of him at the railing with a slow orbit. Style: peaceful, cinematic, golden tones. Lighting: low warm sun, long soft shadows. On-screen text: ‘this hour is mine’. Audio: avatar voice + gentle ambient city-at-dawn tone, no music.

CLIP 4

0:40–0:50

Laptop opens to a clean list + focused nod

🔊 VOICE	<i>“...before the job takes the rest.”</i>
📄 TEXT	...before the job takes the rest.
🎬 PROMPT	Vertical 9:16, 10-second clip, native audio. Use my saved avatar; identity consistent. Back at the tidy desk, same warm light. ACTION 1 (0:00–0:05): the avatar opens a laptop revealing a clean, minimal to-do list on screen (generic UI, no real brand logos); he scans it. ACTION 2 (0:05–0:10): he closes his eyes for a beat, gives a small confident nod, then looks straight at the lens and finishes the thought: ‘...before the job takes the rest.’ Camera: over-shoulder on the screen, then cut to a clean medium-close on his face with a slow push-in. Style: calm, focused, cinematic. Lighting: warm key from the window. On-screen text: ‘my hour, before the job’. Audio: avatar voice + soft keyboard tap + room tone, no music.

CLIP 5 — CTA

0:50–1:00

To-camera close + tag CTA

🔊 VOICE	<i>“Tag someone who needs to wake up earlier.”</i>
📄 TEXT	Tag someone who needs to wake up earlier.
🎬 PROMPT	Vertical 9:16, 10-second clip, native audio. Use my saved avatar; identity consistent. Same desk, warm morning light, framed as a clean to-camera close-up. ACTION 1 (0:00–0:05): the avatar lifts his coffee mug slightly toward the lens in a small ‘cheers’ and gives a warm, genuine smile. ACTION 2 (0:05–0:10): he points lightly at the lens and says, friendly and direct: ‘Tag someone who needs to wake up earlier.’ then holds a relaxed look. Camera: locked-off close-up, tiny push-in on the line. Style: warm, personable, clean. Lighting: soft warm key. On-screen text bottom third: ‘↓ tag them’. Audio: avatar voice + room tone, no music.
