WORK EXPERIENCE

Cognizant

Sep 2023 – Jul 2025

Programmer Analyst | Mount Sinai Health Care

- 1.Designing Azure Data Factory pipeline to bring data from on-prem, AWS, MYSQL, SQL server, ORACLE data sources to cloud.
- 2.Implemented Medallion Architecture (Bronze, Silver, Gold layers) using Azure Data Lake, Databricks, and Delta Lake to structure data pipelines for scalable and governed data processing.
- 3.Managed ingestion of large tables manually in chunks based on client requirements and implemented incremental loads strategies to enhance efficiency and reduce load time
- 4.Worked on building Synapse data warehouse.
- 5.Handled Azure logic apps for notification management.

Aug 2025 – Present

Junor Data Engineer | Toyota Motors North America

- 1.Working on an enterprise-scale data platform following a 3-layer architecture (Stage, Raw, TRN) for large-volume data processing.
- 2.Implemented both Full Load and Incremental Load strategies for multiple tables based on business and technical requirements.
- 3.Developed Databricks Auto Loader pipelines to ingest data from Stage to Raw layer in AWS S3, handling schema evolution and incremental file processing.
4. Developed custom Scala code to load data from the Raw layer to the TRN layer, implementing transformations strictly based on business requirements.
5. Designed and published Denodo virtual views on TRN layer tables to provide curated and governed datasets for business users and reporting teams.
- 6.Built and maintained end-to-end pipeline orchestration using Stone branch, including job dependencies, triggers, and daily batch schedules.

EDUCATIONAL BACKGROUND

Bachelor of Technology - BTech

Electrical and Electronics Engineering

Rajeev Gandhi Memorial College of Engineering and Technology

8.9 CGPA

Aug 2019 - May 2023

PROFESSIONAL

SUMMARY

Cloud Data Engineer experienced in Azure and AWS, specializing in Databricks, pyspark, Scala, and SQL for large-scale data processing and analytics solutions. Proven ability to build reliable, high-performance pipelines that support business insights and data-driven decisions.

Skills &

PROFICIENCIES

Azure
Aws
Databricks
Scala
SQL
Pyspark
Python

CERTIFICATIONS

- 1.Microsoft Azure Fundamentals AZ (900)
2. Microsoft Certified Azure Developer Associate
- 3.Aws Certified Cloud Practitioner
4. Aws Certified Developer
5. Data Engineering with Databricks
